ART CATALOG ON PAPER 2022

Katalog ten to zbiór prac wykonanych na papierze kredowym 380 gr matowym. Tego rodzaju papier jest wykorzystywany w do ruku w drukarniach offsetowych. Jeśli chodzi o to podłoże jest to dla mnie powrót do czasów Liceum plastycznego, bo w tym okresie po raz pierwszy użyłem tego materiału do swoich rysunków głównie tuszem. Ma to związek z moim ojcem, który w tym czasie był przewodniczącym solidarności na kopalni „KWK SIERSZA” (o której ostatnio można usłyszeć w telewizji) i przynosił do domu plakaty wyborcze. Pozostawały po odbytych już wydarzeniach i najczęściej były już niepotrzebne. Jedna strona była zadrukowana a na odwrocie było puste białe podłoże. Dodatkowo tego rodzaju papier jest śliski i niezbyt dobrze wchłania wodę co było nie lada wyzwaniem dla początkującego malarza. Z czasem doceniłem właściwości takiego podłoża. Używałem tuszu jeszcze wtedy nie było takich farb akrylowych jak obecnie. Nauczyłem się panować nad linią walorem i laserunkiem. To była świetna szkoła, bo papier ten nie przyjmował poprawek. Jedno pociągnięcie pędzlem to jedyna szansa na właściwy kształt, plamę w rysunku - jak w japońskiej szkole. Rysując każdego dnia doszedłem do biegłości w opanowaniu ręki, pędzla, tuszu i papieru ofsetowego.

W zeszłym roku 2022 postanowiłem wrócić do tego typu prac. Zamiast tuszu stosuję farby akrylowe, lateksowe, które doskonale przylegają do tego podłoża. Pozwalają na operowanie stopniem przezroczystości i to co najważniejsze, że każdy ślad pędzla i jego włosia jest widoczny. Widać jak przebiega i w jakim kierunku był użyty, to dodaje dużo ekspresji. Trzeba nad tym panować.

Z podobnym technicznym zagadnieniem zmagał się austriacki artysta Egon Scheele, który malował na płytach pilśniowych, farba nie pokrywała jednolicie powierzchni tworząc laserunkowe efekty. Dlatego też dominowały u niego płaskie formy, syntetyzm.

Przyglądając się moim pracom zawartym w tym katalogu w większości dotyczą człowieka. Są to różnorodne portrety, postacie kobiet i zwierzęta. Charakteryzują się ostrym, kanciastym rysunkiem, a także płaskimi jednokolorowymi plamami. Jest syntetyzm, a także dość ostry i intensywny kolor. A mocny obrys czarną linią i wynikającej z tego deformacji sprawia, że prace te łączą ekspresyjne plamy i pociągnięcia pędzla z geometrycznymi formami nadając spójności i indywidualnego stylu.
